Who Are We

Welcome to our 2013 Collection. I hope you enjoy looking at our range of carefully crafted styles and colours – in my opinion our best yet! While you peruse these pages and appreciate the quality and design of our clothing, I invite you to join us on our journey towards sustainability.

As I write this, Mantis World has just been announced as the Source Award winner for Best Sustainable Supplier by the Ethical Fashion Forum. We are delighted to have won, and this accolade makes us more determined to continue to push ourselves and our industry to do things the way we all know they should be done. Every time we are faced with a difficult commercial decision, we go back to our ethos of "Well Made". Will we compromise the quality, the design or the ethics of our production for a cheaper price or a faster delivery time? Suddenly our decision-making becomes easier when we ask – will it be Well Made?

For over a decade we have been at the forefront of the ethical cotton industry and advocates of production in Africa. We have reached a tipping point and as more businesses realise sustainability is an essential part of their business model, we are seeing real change.

So 13 years on from our start, where's next on our journey towards sustainability? This is our promise:

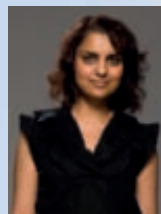

- To increase our use of sustainable fibres year on year
- To only work with mills who have ETP (Effluent Treatment Plant)
- To avoid Uzbek cotton anywhere in our supply chain
- To work with reputable factories holding appropriate certification whom we have visited personally
- To keep researching more sustainable options for manufacture
- To educate and inform our industry

You can take our ethics and values as a given. We hope it is the clothing you will fall in love with.

Thank you for choosing Mantis World.

Prama Bhardwaj, Founder, Mantis World.

**Be
the
change**
you want to see in the world.

Organic

Mantis World continues to increase their use and support of Organic Cotton – certified 100% GOTS® Organic from raw material through the manufacturing and production processes to labelling and dispatch. Here you'll find new style and colour additions to the 2013 Organic Collection.

Organic Cotton is considered to be one of the most sustainable fibres for textile production; it's both natural and renewable whilst avoiding harmful pesticides and chemical fertilizers. The production of Organic Cotton uses methods and materials that have a low impact on our environment resulting in less soil and water contamination, less use of irrigated water, less green house gases and is GMO free. Also the cotton farmers benefit from an improved standard of living. Organic cotton garments are better for the environment, better for textile workers, better for farmers and better for you.

NOT JUST A LOGO

Mantis World is proud to be a member supporting the work of Textile Exchange (TE). TE (formerly Organic Exchange) is a non-profit organisation operating internationally and is committed to the responsible expansion of textile sustainability across the global textile value chain.

Mantis World's mark to identify 100% organic garments: accredited as organic from the raw cotton fibre through manufacturing and production to dispatch of finished garments.

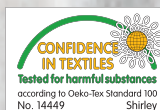

The GOTS® (Global Organic Textile Standard) is a guarantee of the organic status of textiles; from the harvesting of raw cotton to dispatch of the finished garments whilst ensuring all is done in an environmentally and socially responsible manner.

Our Made in Africa logo is exclusive to styles that are made entirely in our partner factory in Tanzania, East Africa: from cotton to finished garment.

Mantis World's key factories work with the SA8000® standard. SA8000 is one of the most stringent codes of social compliance and supports sustainable implementation of policies and procedures including the calculation of a living wage. Mantis World encourage all suppliers to attain SA8000

All our fabrics are tested and verified using the Oeko-Tex® Standard 100 to ensure no harmful substances or dyes are used at any stage of production or left as a residue on the fabric. Our Babywear also holds 'Class 1' certification verifying that it has passed the most stringent safety tests.

Two words that represent our Mantis World ethos, Well Made is about ensuring our garments are made well - without compromise to people, our ethics, our products or the environment in addition to offering great quality, fabrics and styling.

The Business Social Compliance Initiative (BSCI) – a non-profit organisation dedicated to the improvement of working conditions in the supply chain, with factories audited against the BSCI base code. Mantis World works with factories that are BSCI compliant or equivalent as an acceptable level of compliance.

Of the common social standards, the content of the WRAP (Worldwide Responsible Accredited Production) code of conduct is the weakest and least strict on several issues. Although better than no code at all, Mantis World will only work with WRAP approved factories if they have a clear plan to move onto more robust standards within a year.

We are proud to be a member of the Fellowship 500 as organised by the Ethical Fashion Forum and which brings together 500 pioneers in the ethical fashion industry to offer inspiration and support.

Further Information regarding sustainability and an explanation of industry standards – including several of those mentioned above - is available at: www.made-by.org/content/standards, www.oeko-tex.com, www.global-standard.org

Étiquette de col détachable

Un étiquette neutre située à l'arrière du col de chaque vêtement indique uniquement les références relatives à la taille et au modèle, et peut être facilement détachée pour libérer le col du vêtement de toute étiquette. Unbranded Neck Label

Each garment has a small, woven neck label with size information only. The wash care label inside the garment has small Mantis World logo to guarantee authenticity.
